Financial information for patients

**Cambridge IVF**

*Creating your future*

This guide is designed to give you information regarding costs involved for fertility treatment at Cambridge IVF. If at any time you have any questions about the fees, payments or refunds, please contact us.

We understand that choosing the right treatment is a major decision and that the language and concepts can be baffling. We will discuss your options with you at every stage and make sure that you have the information you need to help you achieve the best possible outcome.

### Quality, transparency, affordability

#### Pure IVF & Pure IVF Egg Freezing Package

Costs £2,995 and is an all-inclusive fixed price package, for which most private clinics charge in excess of £5,000. Pure is overseen by experienced consultants and delivered by our fertility nurse specialists. Please see patient information for criteria.

#### Multi-cycle IVF

Costs £9,990 and it is an all-inclusive fixed price package. There is also the option of multi-cycle for existing patients at the cost of £5,995.

More information can be found on individual leaflets and on our website.

## Fertility Health Check

	For couples	For women	For men
	£450	£350	£150
Diagnostic semen analysis	✓	✗	✓
Ovarian reserve blood test (AMH)	✓	✓	✗
Ovarian ultrasound scan	✓	✓	✗
Comprehensive fertility review and consultation	✓	✓	✓

## Consultations and fertility assessments

Pure IVF consultation with a nurse **£100**

Pre-IVF consultation with a consultant (60 minutes) **£200**

Diagnostic/Baseline Scan **£95**

Review consultation (30 minutes) **£110**

Embryology review **£100**

## Treatment packages

IVF treatment package	<b>£3,190</b>
ICSI treatment package	<b>£4,250</b>

### What's included?

- ✦ All monitoring ultrasound scans
- ✦ Egg recovery including sedation
- ✦ Blastocyst culture (where required)
- ✦ Embryo transfer pregnancy scan or a review consultation
- ✦ Two counselling sessions

### What's not included?

- ✦ HFEA licence
- ✦ Pre-treatment assessments
- ✦ Cost of drugs
- ✦ Blastocyst freezing
- ✦ Embryoscope

Our treatment packages are available at Cambridge IVF and our satellite clinic, Ipswich IVF.

Our laboratory is in the Cambridge clinic. If you choose to have your treatment from Ipswich you will be required to travel to Cambridge for your egg collection and embryo transfer (or insemination if you are having IUI). The rest of your appointments will be in Ipswich.

We do not include pre-treatment assessments, baseline scans or blastocyst freezing in our package prices.

## Other packages

### Frozen blastocyst transfer package | £1,495

#### What's included?

Nurse consultation • all ultrasound scans and blood tests • blastocyst thawing, transfer and culture • pregnancy scan or review consultation • one counselling session

You will also be required to pay for the HFEA fee £ 80 and drugs which average £250 - £850.

### IUI package | £795

#### What's included?

All ultrasound scans and blood tests • the insemination procedure • pregnancy scan or review consultation • counselling session

You will also be required to pay for the HFEA fee, the pre-treatment assessment, donor sperm (if required) and drugs which average £500 - £600.

## Freezing and storage

### Freeze all | £275

Freezing of all embryos gives an additional advantage of almost eliminating the risk of ovarian hyperstimulation syndrome or OHSS as it is known. The frozen transfer will replace the fresh transfer included in your chosen package.

#### What's included?

- ✦ Vitrification
- ✦ 1 x Frozen Blastocyst Transfer
- ✦ First year storage

### Egg freezing package | £3,300

#### What's included?

- ✦ Vitrification and first year storage
- ✦ All monitoring ultrasounds
- ✦ Egg recovery including sedation

#### What's not included?

- ✦ HFEA fee
- ✦ Cost of drugs
- ✦ Pre-treatment assessment

Blastocyst freezing by vitrification and first year's storage	£600
Annual egg storage from year two onwards	£250
Annual blastocyst storage from year two onwards	£250
First semen freezing including one year of storage	£300
Subsequent semen samples for freezing	£150
Annual semen storage from year two onwards	£250

HFEA Fee	£80
HFEA Fee with donor insemination	£37.50
EmbryoScope™	£500
Counselling session	£60
Admin fee for medical summary/referral	£25-£50
Admin fee for private prescription	£50
Admin fee for transport of gametes out of CIVF to UK clinic	£100
Admin fee for transport of gametes out of CIVF to overseas clinic	£175
Admin fee for transport of gametes out of CIVF to overseas clinic (including special export directive)	£300

## Diagnostic tests and screening

Diagnostic semen analysis (DSA) and post vasectomy semen analysis	£130 (for each test)	Diagnostic Blood Tests (AMH, FSH, LH, TSH, FBC, Vit D)	£130
DNA fragmentation test (includes DSA)	£350 (only available in Cambridge)	Chlamydia	£45
Motile sperm organelle morphology examination (includes DSA)	£250 (only available in Cambridge)	CMV	£30
Retrograde ejaculation analysis	£150	Cystic Fibrosis	£200
Antisperm antibody testing	£150	FSH and full blood count	£30 (for each test)
		Hepatitis B – Core antibody, Hepatitis B – Surface antigen and Hepatitis C	£50 (for each test)
		HyCoSy	£450
		Hysteroscopy including biopsy	£750
		LH	£10
		Lupus anticoagulant	£80
		Oestradiol (E2), Progesterone and Prolactin	£30 (for each test)
		Rubella	£30
		Syphilis	£50
		Testosterone and Toxoplasmosis	£45 (for each test)
		TSH	£10
		Viral testing	£100

Unfortunately, treatment cycles are occasionally cancelled for clinical reasons. For instance, patients may fail to respond adequately to stimulation, meaning that egg collection is not possible. Conversely, some patients may over-respond to stimulation and the medical team may advise that there is a very high risk of developing Ovarian Hyperstimulation Syndrome if treatment continues.

We understand that any decision to cancel is a serious disappointment to you. Hence we try to avoid situations in which we are forced to advise cancellation. However, sometimes we must do so in the interests of your health and well-being or where an outcome is not within our control. Cambridge IVF staff will always include you in these discussions and be open about the reasons for advising cancellation.

### IVF/ICSI/MACS ICSI – SINGLE CYCLES ONLY

#### Cancellation before egg collection

If your single IVF, ICSI or MACS ICSI cycle is cancelled at any stage before egg collection, a refund minus a charge of £650 and any drug costs incurred up to that point will be given.

#### Cancellation after egg collection

A £200 refund will be given.

#### Complete failure of fertilisation

In very rare cases, where none of the eggs collected fertilise and there are no embryos to transfer, £200 will be refunded.

#### Freeze all embryos

In certain circumstances, it may be necessary to freeze all of your embryos for clinical reasons, most commonly because of the risk of OHSS. In these circumstances, there will be a cost of £245 which will cover the cost of vitrification, frozen embryo transfer and the first year of storage. The frozen transfer will replace the fresh one.

### Frozen blastocyst transfer

- ⚡ If a frozen blastocyst transfer is cancelled before thawing, there will be a charge of £150 plus any drug costs incurred.
- ⚡ If a frozen blastocyst transfer is cancelled after thawing there will be a charge of £250 plus any drug costs incurred.
- ⚡ If we cancel your natural cycle frozen blastocyst transfer due to the expected day of transfer falling on a Sunday a full refund will be made.

### DI/IUI

- ⚡ If a cycle of DI or IUI is booked but then cancelled there is a fee of £250.

Any refunds will be paid once our finance department has received confirmation of the change in treatment from Cambridge IVF staff. Any outstanding costs will be deducted from refunds. Refund payments will be by card (but only to the card used for the initial payment) or cheque.

### Queries and questions

Working out how much you may need to pay isn't always easy. If you have any queries about this please call 01223 349019 or about any other aspect of our service, please call us on 01223 349010. If you're planning to have your treatment led at Ipswich call 01473 703092. You can also email us at [enquiries@cambridgeivf.org.uk](mailto:enquiries@cambridgeivf.org.uk) or reach us on Twitter @CambridgeIVF or Facebook @Cambridge IVF.

### Pregnancy scan

An early pregnancy scan at the Rosie or Ipswich Hospital is included in your package price.

### Drug costs

These are additional to the treatment package cost, unless you are having PURE, Multi-Cycle or the PURE Egg Freezing Package. Post pregnancy test drugs are additional to the all-inclusive package prices and will be invoiced separately.

Please be aware that the drug costs vary according to the regime prescribed but on average drug costs range from £1,500 to £4250 per cycle of IVF or ICSI.

All drugs prices are inclusive of VAT and include home delivery. A charge of £65 will be added for Saturday deliveries.

Please be aware that occasionally further medication may be required due to a number of factors including dose, length of prescription and whether the type of medication has to be changed, therefore on occasions further medication costs may be incurred with additional delivery costs.

Payment for consultation and pre-treatment screening tests are at the time of booking. If a consultation is cancelled with less than 48 hours' notice, no refund will be made.

Payment for treatment packages, additional services and drugs are payable prior to the commencement of treatment.

If you decide to cancel your treatment after your consultation but prior to receipt of drugs and start of treatment the package price will be refunded.

### How to pay

**Payment can be made by the following methods:**

- ⚡ Credit Card/Debit Card payment: Over the phone or in person at the unit.
