

## Why choose Cambridge IVF?

Cambridge IVF is not just another fertility clinic. We are an [assisted conception](#) unit backed by some of the world's most advanced medical research and offering a unique journey for each family in our care.

## Whatever your situation, we are here for you

If you are a heterosexual couple, a same sex couple, a single woman, a single man, or transgender person, we are here for you. We will adapt to your situation and needs to ensure we offer you the most appropriate fertility treatment and fertility preservation plan for you. We are here to help you create the family of your dreams, either now or in the future.

## We offer personalised care

We offer individualised care and personalise your treatment to your specific requirements. Your care and treatment are unique to you and we will involve you every step of the way offering advice that is based on good-quality evidence, years of practical experience and our knowledge of the latest research.

We will make sure you always have time to air your views on how your treatment should be managed and you will be included in any decisions taken during key stages of your treatment. At the same time, we will keep in mind the small things that make life easier: flexible appointment times, complimentary parking, and support beyond just your consultation and treatment appointments.

## We provide joined up care as part of CUH

We are part of Cambridge University Hospitals (CUH) but located away from but close to the main hospital campus. This allows us to provide a discrete, supportive and welcoming environment with [state-of-the-art facilities](#) offering a safe and seamless experience from investigation, through

treatment and beyond.

To make our services more accessible for people all across the region, we run a satellite service via [Ipswich Hospital](#). We are able to offer diagnostic services, consultations, scans and stimulation monitoring in Ipswich meaning you only need to travel to Cambridge for [egg collection](#) and [embryo transfer](#) procedures.

## Confidence and safety are at our core

Cambridge IVF has been designed to provide what few units anywhere can match in terms of quality and safety. Our sophisticated laboratory suite has been equipped with the very best in leading-edge technology to prevent risk, improve efficiency and give the best possible platform to help you conceive.

Safety and confidence in our processes are built into the DNA of Cambridge IVF in every level of the service we offer to you:

- We deploy state of the art electronic consenting systems to ensure you have all of the information to make informed consent and that that consent is captured accurately.
- We deploy an electronic facility monitoring system to constantly monitor our laboratory equipment to protect your developing embryos in every way possible, 24 hours a day, 7 days a week.
- We deploy an electronic traceability system, RI Witness to monitor your gametes and embryos during laboratory procedures to ensure there is no risk of contamination or laboratory error.
- We deploy the EmbryoScope incubator to facilitate time-lapse morphometric analysis of [embryo](#) development to give your embryos the best possible environment in which to thrive.

We know how important security and confidence are to you and we have taken every possible step to demonstrate that the safety and quality of your developing embryos whilst in our care is our primary concern.

## We are a UK lead on quality service

We offer a wide range of techniques including [fertility treatments](#), fertility preservation and [andrology diagnostic services](#) to help you in [your journey](#) to parenthood. We have the very best technologies available at your service, including the [Embryoscope](#) time-lapse system.

At our heart is a [team](#) of professionals that will bring you quality care, the best in science and the latest in research so that between us we can help you create your future. We will help you through every step of your journey and will always recommend what is more suitable for you and only if you really need it. We will never offer you something you do not need, will not benefit from, or is not safe.

## NHS excellence at an affordable price

We offer treatment funded by the NHS as well as self-funded options. We have two amazing programs available for our patients right now:

[PURE IVF](#) costs £2,950 and is an all-inclusive fixed price package, for which most private clinics charge in excess of £6,000.

[Multi-cycle IVF](#) costs £9,990 and is an all-inclusive fixed price

We are able to offer this because we are an NHS clinic dedicated to delivering the best possible

---

results for all of our patients at a sensible price, rather than generating big profits.

In short, our priority is to help you to conceive and provide a high quality, transparent and affordable service. Unlike private clinics, the money you pay goes straight back into the NHS.

## **We are committed to excellence and innovation**

We have state-of-the-art, forward-thinking facilities with a vast depth and breadth of knowledge and experience in all disciplines. Our close links to the research community in Cambridge mean we can bring the latest developments into clinical practice quickly and safely.

We also conduct [research](#) in our facilities and in collaboration with other institutions with the aim of improving our service with the best and most advanced treatments.

In these times of great change, we are continually looking at ways we can improve our services to make them more efficient, safer and more environmentally friendly whilst considering your expectations and maintaining social distancing to keep you and our team safe. By offering virtual consultations and meetings and one-stop appointment services we aim to make treatment more convenient and safer to you whilst minimising our carbon footprint. Better for you, better for us, better for the environment.

## **Still not sure?**

We would be very glad if you chose us in your journey to parenthood. If you still have doubts, [contact us](#) to discuss your particular case, and we will help you decide. We are here for you, whatever your needs. Come create your future at Cambridge IVF.
